EDUCATION

Camosun College   Victoria, BC
Diploma, Information and Computer Systems   *Sep. 2021 – Aug. 2023*

Thompson Rivers University   Kamloops, BC
B.S. Computer Science   *Sep. 2023 – Present*

EXPERIENCE

Software Developer Internship   May 2023 – Present
Quester Tangent Corporation   *Victoria, BC*
- Developed, documented, and tested software for use in the global rail transit system
- Conducted comprehensive codebase evaluation to ensure compliance with global safety standards, identifying and addressing potential risks and vulnerabilities

Software Developer Internship   May. 2022 – Aug. 2022
Unity Technologies   *Vancouver, BC*
- Contributed to the success of a VR education platform through involvement in development, testing, and client relationship management, resulting in a successfully shipped product
- Designed and implemented an automated video compression and uploading process, streamlining the multimedia pipeline between the company and clients
- Created unit-testing and scripting tools in Python and Google Apps Script

Technologist   Apr. 2021 – Apr. 2022
Cascadia Seaweed   *Victoria, British Columbia*
- Streamlined a data entry effort of several hundreds of pages of handwritten notes, resulting in a time savings of three weeks
- Led the design and testing of software for an underwater camera system, contributing to the successful completion of a federal environmental sustainability project

PROJECTS

Cuboh | *JavaScript, React, Python, Django*   May 2023 – Present
- Led a team of fellow students in developing a versatile full-stack web application for a modern, fast-paced startup
- Designed and developed an intuitive drag-and-drop interface with a focus on excellent UI/UX
- Implemented an input validation endpoint in Django
- Leveraged GitHub data to show collaboration

ntaylor.dev | *TypeScript, React, TailwindCSS*   May 2023 – Present
- Designed, implemented, styled, and published a responsive developer portfolio page to showcase my skills and experience

seamcarve | *Python, JavaScript, Flask, OpenCV*   Apr. 2023 – Present
- Developed a full stack seam-carving application, using JavaScript for the front-end and Python for the back-end
- Integrated the front-end and back-end components using Flask, ensuring seamless data flow between the two

sudoku | *TypeScript, React, TailwindCSS*   Dec. 2022 – Jan. 2023
- Created a computer vision app to solve any Sudoku puzzle using the user's webcam
- Leveraged machine learning tools and advanced computer science topics to create a dynamic, impressive user experience

TECHNICAL SKILLS

Languages: Python, C/C++, TypeScript, JavaScript, Rust, HTML/CSS
Frameworks: React, Node.js, Flask, Django, OpenCV
Developer Tools: Git, Docker, Kubernetes, VS Code, GitHub Actions, Perforce
Libraries: NumPy, Matplotlib, PyTorch, Sci-Kit Learn, Ant-Design, TailwindCSS
